# The Crosswater Advantage

As bathrooms have evolved into more experiential spaces for relaxation & revitalisation, Crosswater has curated a stunning mix of colours, textures and materials across a broad range of bathroom elements, allowing you to design your own perfect bathroom space.

This is the **Crosswater advantage**.

## MPRO Brushed Bronze

### MODULE PUSH

All MODULE shower valves are thermostatically controlled for 100% safety. Trim sets include: flow control, thermostat, minimalist backplate and handles.

Module Push presents the latest in luxury showering technology and design. Featuring a sleek, minimalist design, Module Push elevates any modern showering space.

The precise water flow and thermostatic controls provide the opportunity to tailor your showering experience to your needs. With push button on/off controls, Module Push is easy to use without the need of gripping a lever. This functionality allows you to leave your temperature and flow controls in place, ready for the next time you step in. Enjoy water flow from multiple outlets at the same time with its multi-button design.

### MODULE PUSH

All MODULE shower valves are thermostatically controlled for 100% safety. Trim sets include: flow control, thermostat, minimalist backplate and handles.

**NEW**

**Module Push** presents the latest in luxury showering technology and design. Featuring a sleek, minimalist design, Module Push elevates any modern showering space.

The precise water flow and thermostatic controls provide the opportunity to tailor your showering experience to your needs. With push button on/off controls, Module Push is easy to use without the need of gripping a lever. This functionality allows you to leave your temperature and flow controls in place, ready for the next time you step in. Enjoy water flow from multiple outlets at the same time with its multi-button design.

# MODULE PUSH

All MODULE shower valves are thermostatically controlled for 100% safety. Trim sets include: flow control, thermostat, minimalist backplate and handles.

Module Push presents the latest in luxury showering technology and design. Featuring a sleek, minimalist design, Module Push elevates any modern showering space.

The precise water flow and thermostatic controls provide the opportunity to tailor your showering experience to your needs. With push button on/off controls, Module Push is easy to use without the need of gripping a lever. This functionality allows you to leave your temperature and flow controls in place, ready for the next time you step in. Enjoy water flow from multiple outlets at the same time with its multi-button design.

## MPRO INDUSTRIAL

Unlacquered Brushed Brass is a natural living finish, it has been specifically designed and manufactured to oxidise over time resulting in a change of colour and unique look which gives even more personality to your bathroom.

# BASIN WASTES & TRAPS

15 Year Guarantee\*  
Peace of mind

## Basin wastes to match your bathroom perfectly

The most popular Crosswater waste is universal, which will work with basins with or without an overflow. Separate slotted and unslotted options are also available, which adds simple pop-out cleaning.

Slotted Waste

If your basin has a built-in overflow, you will need a SLOTTED basin waste which will allow overflow water to be drained, whether the waste is open or not.

Unslotted Waste

If your basin doesn't have a built-in overflow, you will need a UNSLOTTED basin waste which is watertight and does not allow overflowing water to feed into the waste pipe.

Typically Crosswater wastes have a premium and straightforward click-clack mechanism which requires a single push to close and to open, but a permanently open free-flow waste is also available. The flip-top waste spins in within itself to close and open the water flow.

# Understanding your water system

To select a showering system that will give the optimum performance, you need to identify the water pressure of the plumbing system in your home.

## What is water pressure?

Water pressure is a term used to describe the flow strength of water through a pipe. It is measured in bar.

## Why is this important?

While the majority of Crosswater products are compatible with most systems, some products require a certain level of pressure to work effectively.

All products in this brochure are clearly marked with a pressure rating in bar, and you must check that your water system can produce the required level to deliver the best experience.

## Water saving regulators

Should you wish to reduce the water consumption of your household, you can easily insert a flow regulator into your basin tap or shower hose/head.

### 5 lpm Basin Tap Flow Regulator

Designed for taps with screw in circular aerator housing

35.6184.0

### 3.5 lpm Basin Tap Flow Regulator

Designed for taps with screw in circular aerator housing

35.6182.0

### 8 lpm Shower Flow Regulator

Designed for hand showers or fixed heads operating min 1 bar

58.8638.1

£6.50

### 6 lpm Shower Flow Regulator

Designed for hand showers or fixed heads operating min 1 bar

58.8636.1

£6.50

## Hot Gravity & Cold Gravity/Mains

### Low Pressure Systems

- You have a cold water storage tank in the loft.
- You have a hot water cylinder.
- You do not have a shower pump installed.

If all of the above apply to your home, you can only choose products marked with 0.2 bar.

If you live in a two-storey property, the downstairs areas will typically support products marked with 0.2 – 0.5 bar where the cold water tank is in the loft.

## Combination Boiler

### High Pressure Systems

- You have a combination boiler that heats water on demand.
- You do not have any storage tanks.
- You do not have a shower pump installed.

If all of the above apply to your home, you can choose any product from 0.2 – 1.0 bar.

## Mains High Pressure

### High Pressure Systems

- You have an unvented cylinder with an expansion cylinder.
- You have no cold water tank in the loft.

If either of the above apply to your home you can choose any product marked 0.2 – 3.0 bar.

## Pump Assisted

### High-Pressure Systems (0.5 bar and above)

- You have a booster pump fitted.

Where a gravity flow of water is more than 0.6lpm, this is known as a 'Positive Head' condition (e.g. when your shower head is positioned lower than your cold water storage tank). In this situation, a positive shower pump can be used.

A 'Negative Head' condition is when the gravity flow of water is less than 0.6lpm (e.g. when your shower head is positioned above the cold water tank level). In these conditions, a negative head pump must be used.

Negative shower pumps will work in both positive and negative head conditions. So, for example, in a situation where there is a shower head above and below the water tank level, one negative shower pump can be used for both.

By matching the pump output to the required flow, you can install any of our products e.g. a 3 bar pump ensures you can select all products marked 0.2 – 3.0 bar.

# Product Guidelines

## Product Compatibility

While the majority of Crosswater products are compatible, care should be taken on product selection before ordering to avoid installation issues.

## Cleaning

All Crosswater products should be cleaned with warm soapy water only and polished with a clean, soft, dry cloth.

More information can be found at [www.crosswater.co.uk](http://www.crosswater.co.uk)

## Unlacquered Brass

Unlacquered Brass is a natural living finish, it has been specifically designed and manufactured to oxidise over time resulting in a change of colour and unique look which gives even more personality to your bathroom.

## Quality

All Crosswater brassware products are manufactured to the following standards, where applicable:

- EN 817:2008 for mixer valves
- EN 200:2008 for single and combination taps
- EN 1111:2017 for thermostatic mixing valves
- EN 1112:2008 for shower outlets
- BS EN 1113:2015 for shower hoses
- EN 248:2002 for electrodeposited coatings of Ni-Cr

# 15 Year Guarantee

All Crosswater brassware and shower valve products are guaranteed for 15 years unless otherwise stated.

All Crosswater guarantees are subject to online registration.

To register and activate your guarantee or for full details of all Crosswater guarantees, please visit [www.crosswater.co.uk](http://www.crosswater.co.uk)

**Crosswater guarantees do not affect your statutory rights.**

For further advice visit [www.crosswater.co.uk](http://www.crosswater.co.uk)

## Find a local bathroom specialist at [www.crosswater.co.uk](http://www.crosswater.co.uk)

### Expertise, design & aftercare

Specialist bathroom retailers can offer expert assistance with your bathroom design, providing full 3D plans to help you visualise and create your own perfect bathroom space. Once your bathroom is installed, they can offer a personal point of contact for any after sales support you may need, delivering complete peace of mind.

### Experience the products

The purchase process is an emotional one. Specialist showrooms allow you to touch and feel a wide variety of bathroom products in relaxed surroundings while gaining inspiration from knowledgeable professionals who will explain the benefits of each product and make recommendations that match your personal preferences.
