June 2022

The Crosswater Advantage

As bathrooms have evolved into more experiential spaces for relaxation & revitalisation, Crosswater has curated a stunning mix of colours, textures and materials across a broad range of bathroom elements, allowing you to design your own perfect bathroom space.

This is the **Crosswater advantage**.

CANVASS

Our Canvass collection blends clean lines with a classic Carrara Marble effect worktop, giving a remarkable midcentury modern style with ample storage. Choose from wall mounted or add the optional angular legs to create a vanity unit.

With four wonderful colours to choose from and three handle designs in complementary finishes, you can create a unique piece for your bathroom.

10 Year Guarantee*

Maximum water temperature 70 °C

ARTIST®

The stunning Artist collection is a perfect blend of form and function which makes high-end furniture for bathrooms more accessible.

Featuring a signature solid oak worktop Artist is truly differentiated. Its fusion of softer, more human styling, textures, colours and natural materials cross typical boundaries.

Depending on brassware selection, it can easily be the centrepiece of a modern, contemporary or classic bathroom space.

Artist solid wood worktops and beech veneer legs are produced from sustainable sources with a specially formulated anti-UV varnish to protect the wood and prevent the wood from fading.

The unique nature of real wood means there will always be variance in tone, grain and colour appearance, this is just part of the enduring beauty of real wood.

Worktops

All worktops are produced from 18mm thick, high density core board. The surfaces are resistant to day to day wear and tear, impact, scratching and normal household cleaning agents. White and grey worktops are slightly matt with a subtle texture. The Pure white Gloss edging matches the furniture carcass. All worktop tops have a factory fitted aluminium reinforcing bar on the underside.

Real wood veneer

All our real wood veneer finishes are book matched and produced from sustainable sources. The characteristic nature of natural veneers means there will be variance in tone, grain and colour, this is just part of the enduring beauty of wood veneer furniture.

When ordering more than one unit we recommend taking delivery of products at the same time.

Glass basins

Our glass basins are handcast from low iron soda lime silicate glass.

Each basin is impervious and conforms to EN572-9:2005 and EN 14688:2009. Maximum water temperature 70 °C.

They are supplied with a chrome overflow ring as standard, we also have an optional Matt Black overflow ring available.

Fully Co-ordinate Your Bathroom

Why not add a matching toilet furniture unit? We offer a wide range of finishes to match your furniture. See page 136 for our full range.

Glide II cast mineral marble basins are manufactured from a mix of dolomite and elastic resin, then finished with a high gloss nanocoat. This unique material is antibacterial, easy to clean, extremely durable and impact resistant making it perfect for a bathroom.

NEW

INFINITY

Taking bathroom furniture to another level. Infinity is simplicity in its finest form. A smart, modular wall hung storage furniture collection that allows you to specify layouts from 500 to 1400mm wide to create your perfect unit.

INFINITY Made Easy

Infinity modular units can be used to design your personalised storage solution; with our drawer units, shelving units and worktops the layout options are almost infinite.

Choose your layout

Infinity drawer and shelving units can be used in combination to create layouts from 500mm to 1400mm wide. Please use the below to select your ideal layout:

500 Layout

- 1 x drawer unit
- 1 x 510mm worktop
- 1 x handle

700 Layout

- 1 x drawer unit
- 1 x shelving unit (left or right)
- 1 x 710mm worktop
- 1 x handle

900 Layout

- 1 x drawer unit
- 2 x shelving units
- 1 x 910mm worktop
- 1 x handle

1000 Layout

- 2 x drawer units
- 1 x 1010mm worktop
- 2 x handles

1200 Layout

- 2 x drawer units
- 1 x shelving unit (position left, right or centre of drawers)
- 1 x 1210mm worktop
- 2 x handles

1400 Layout

- 2 x drawer units
- 2 x shelving units
- 1 x 1410mm worktop
- 2 x handles

Customise to suit your style

Infinity is available in a range of finishes, making it the perfect choice for any style bathroom. Keep all the units in one colour for a cohesive look or mix and match for a bolder look.

Rimless Design

The smart rimless design creates not only a better looking toilet but a cleaner and more hygienic toilet as there is nowhere for bacteria, limescale or grime to accumulate.

Additionally, the fully glazed internal waterways feature means Glide II toilets deliver complete cleanliness.

Space Saving

Glide II wall hung toilets are available in a short projection variant which is a little wider but has 2" shorter projection for rooms where optimising space is critical.

Crosswater flush plates complement any bathroom design. We offer a wide range of finishes to beautifully match your brassware, toilet and furniture.

Our flush plates are:

- Easy to fit
- Dual flush - including eco flush
- Smooth yet positive operation
- Manufactured from high impact, tough ABS or thermal tempered glass
- Actuation force 20NM
- Compatible with our toilet frames and concealed cisterns

There is no need to worry about maintenance as all cistern parts can be accessed by simply removing the flush plate.

The dual flush technology allows you to reduce your water usage by up to 40%. Press the large button to flush with the entire water volume, or the smaller button for an Eco flush (reduced 3 litre volume).

Beautiful outside, intelligent inside

Our Image mirrored cabinets sets new standards with innovative technology, classic design and proportions which contain ample space for all your storage needs. Featuring double-sided fully mirrored doors for comfortable and expansive head and shoulders viewing. Full-width overhead LED light canopy provides outstanding brightness that can be changed from warm white (3000K) to daylight (6000K) to suit your mood. An extra LED light source illuminates the tap and basin on the underside of the cabinet

Open the cabinet to find height-adjustable safety glass shelves with a stunning fully mirrored back. Additionally, LED lighting appears on each interior side of the cabinet to illuminate all your favourite items. As well as a charging socket for shaver or toothbrush.

Innovative Design For High Heat Output

Air rails feature innovative manufacturing technology that injects air at very high pressure into the cross rails, this expands the cross rails to allow more hot water to circulate to generate excellent heat output.

Heated Towels All Year Round

MPRO All electric towel warmers are ideal for bathroom projects where installation on the central heating system is not possible. Oil filled and 100% pressure, leak and function tested at our factory.

Oil filled means better and more even heat distribution throughout the entire rail, excellent heat retention so less energy is required to top up temperatures in your room. Once the timer period has ended these rails will continue to gently radiate heat and keep the room comfortable because the oil inside is designed to cool slowly.

Great for the summer time when the central heating is off but cosy warm towels required.

Why Choose Electric?

Our MPRO Electric towel warmers are supplied with a control dial, instead of a traditional valve, which includes innovative features:

- 5 temperature settings ranging from 30°C to 60°C.
- An electronic temperature sensor that guarantees precise temperature control
- Illuminated LED indicators display the set temperature level and the status of the heating
- Dryer/Boost on demand function allows the setting of a higher heating power for two hours, after which the element returns to the previous setting
- In the event of a power failure the element remembers the previous settings therefore making it suitable for connection to external timers

You can rely on the safety of our MPRO Electric towel warmers:

- The element is equipped with frost protection and double protection against overheating
- The display shows warning indicators in case of malfunction
- An active safety feature in case the rail runs dry
- Low power consumption in a standby mode

SUMMER HEATING ELEMENTS

Electric Element

Supplied with T Piece

IP54 rated

These elements can be used in an all electric installation, we do not offer this service.

300w	RADX350	£115
600w	RADX700	£130

Also known as dual fuel or dual energy. Connected to a central heating circuit and including an electrical element that allows operation in summer months when the central heating is not in use.

All Crosswater towel rails are suitable for use with a summer heating element, except MPRO Electric models. Refer to pages 166 for wattage required per model.

Important Note

Please refer to the bathroom zone diagram when using electrical components within the bathroom environment, see page 167. The summer element is equipped with a thermal fuse that will cut out at 65°C, with a total shut down safety setting at 78°C.

These elements are suitable for all Crosswater towel warmers, where an element can be fitted. Heating elements comply with BS EN60335-2-73:2003

Metallic Black Matt / Soft White Matt Finishes Oxsilan® providing up to 65% more protection than standard zinc coating. High quality double layer Electro-static powder coating application for 100% surface coverage, massively reducing wear and tear and greater product lifetime. The most efficient heat output up to 20% higher than chrome. Self coloured metal wall fixings.

Chrome Finish Each rail is 100% wheel polished and sandblasted then electro chemically de-greased and bleached to prevent oxidising, ten: Nickel Primer 3micron / Copper coat 20-25 micron (for flatter surface and enhanced protection) / Nickel 20-25 micron / Chrome finish 0.5 micron - Result level 10 chrome plated finish.

Towel Warmer projection is between 75 - 100mm. Supplied with complete wall fixings and manual air vent. Manufactured from high grade mild steel conforming to EN 10305. Geometrical and surface finish - Round EN 10234 / EN ISO 4287, Flat Tube EN 10233 / EN ISO 4287, D Profile EN 10233 / EN ISO 4287. Fitted with 1/2" BSP connections. Tested to EN 442 ΔT = 50K All outputs certified to EN 442. To make an approximate conversion from T=50K to T=60K multiply outputs by 1.2.

**Summer Heating Elements are supplied with T Piece.

Electrical Information

The diagram below is supplied as a guide to Bathroom Zones as referred to in IP ratings of the over mirror lamps and electric heating elements. Please refer to the latest edition of BS 7671:2008(2011) to ensure conformity.

It is important to install light fittings and electric Towel Warmer elements in the correct bathroom zone i.e. the zone referred to in the IP rating of the element. This is not an installation guide and reference should be made to the latest edition of the IET Wiring Regulations or a qualified electrician member of NICEIC or IET.

Zone 0 is inside the bath or shower tray itself. Any appliance used in this zone must be rated at least IP67 which is total immersion proof.

Zone 1 is the area above the bath or shower tray to a height of 2.25m from the floor. In this zone a minimum rating of IP44 is required and elements must also be protected by a 30mA residual current device (RCD) to protect the circuit. The electrical connection to the power supply for these appliances must be in Zones 2/3 of the bathroom in compliance with BS 7671:2008(2011) - IEE Wiring Regulations.

Zone 2 is an area stretching 0.6m outside the perimeter of the bath and to a height of 2.25m from the floor. In this zone an IP rating of at least IP44 is required. In addition it is good practice to consider the area around a washbasin, within a 60cm radius of any tap to be considered as zone 2.

Crosswater IP44 lamps come without a pull switch, and are designed to operated via an existing and suitable room light switch.

Failure to have electrical products installed and certificated by a qualified electrical engineer will invalidate any product guarantee.

For full details reference should be made to the latest copy of the IEE wiring regulations and all applicable British Standard and European norm specifications.

Product Guidelines

Product Compatibility

While the majority of Crosswater products are compatible, care should be taken on product selection before ordering to avoid installation issues. The colours and finishes reproduced in this brochure are as accurate as the photography and printing process allows but may vary from the actual colours. Product sizes stated are nominal and should be checked against product. It is strongly advised that all bathrooms are well heated and ventilated.

Installation

All furniture ranges incorporate a factory fitted hanging system that allows safe and simple installation. Please ensure the correct wall fittings are used on solid or stud walls. Some furniture products are reversible for left or right hand door opening.

When installing a wall hung toilet or basin please ensure that appropriate fixings or suitable framework are used. When purchasing a wall hung toilet or basin on its own Crosswater does not supply fixings.

We strongly recommend all furniture and ceramics are fitted to a tiled surface, not tiled up to, this will assist any future maintenance. Due to the weight of some products you must ensure that the walls you are fixing to are of a suitable construction to support the product.

Vitreous China must not be put under stress during installation, if fittings are over tightened it creates stress within the ceramic material which may in time cause the failure of the product. Waste fittings should be carefully sealed in silicone and the back nut hand tightened, one additional final quarter turn using a suitable spanner is sufficient to create the required watertight seal. Care should also be taken when fitting brassware to prevent similar stress related failures. All products should be inspected before attempting installation.

It is the responsibility of the individual installer to ensure that products are fitted correctly and in line with the recommended fitting instructions provided. Failure to do so will invalidate the guarantee.

Cleaning

All Crosswater products should be cleaned as outlined below. Never use any aggressive fluids or strong household cleaning agents e.g. bleach, caustic soda or abrasive cleaners, which could damage the product.

Furniture should be wiped cleaned with a moist soft or micro fibre cloth. Any stubborn marks can be removed with diluted mild detergent.

Mirrors, cabinets and light fittings should be cleaned with a micro fibre cloth only, do not use "glass and mirror" cleaning products.

Sanitary ware, glass basins and ceramics should be cleaned after use by applying a little cream-type cleaner using a sponge or damp cloth and rinsed thoroughly with clean water. In hard water areas a good quality limescale remover can be applied.

Toilet seats should only be cleaned using a diluted mild detergent or warm soapy water; products containing bleach can lead to staining. Toilet seat hinges should be cleaned using a moist soft or micro fibre cloth. Any stubborn marks can be removed with diluted mild detergent.

Cast mineral resin basins should be cleaned using a diluted mild detergent or warm non-abrasive soapy water; in hard water areas a good quality limescale remover can be applied. Accidental spillages of household chemicals, nail polish or hair dye should be removed immediately by cleaning the surface with warm soapy water and then wiped dry.

Towel Warmers should be cleaned when cold with a moist soft or micro fibre cloth. Any stubborn surface or oxidation marks can be cleaned with Maas® Metal Polishing Crème, that will leave a long-lasting, fingerprint repelling protective finish.

Product Guarantee

All Crosswater products carry a comprehensive guaranteed for complete peace of mind.

All Crosswater guarantees are subject to online registration.

To register and activate your guarantee or for full details of all Crosswater guarantees, please visit www.crosswater.co.uk

Crosswater guarantees do not affect your statutory rights.
