Shower Enclosures & Trays

March 2021

The Home of Showering

Over time as bathrooms have evolved into more experiential spaces for relaxation & revitalisation, Crosswater has curated a comprehensive collection of high-quality solutions covering each essential element.

From the beating heart of the shower valve to the outlet that delivers the perfect flow of water to the reassuring glass that envelops you, making you

feel safe and relaxed in your own private personal space. Crosswater has it covered.

This holistic approach covering each element truly makes Crosswater **'The Home of Showering'**.

To help you easily choose your perfect shower enclosure, our products are offered in various thicknesses.

Enclosures & trays

This brochure focuses on enclosures, trays and bath screens. Glass panels are offered in various thicknesses in many typologies, different configuration options and numerous sizes to suit almost any bathroom design and budget.

All Crosswater products are supported by a network of over 1000 approved retailers who can be found at www.crosswater.co.uk

Reassuring Performance, Always.

For over 20 years, Crosswater has been recognised as a leading supplier of premium shower enclosures, trays, bath screens and accessories. We employ a combination of trusted manufacturing techniques, high-quality materials and certified finishes to bring you products of the highest possible calibre.

Rest assured, all of our glass panels are manufactured from toughened safety glass in accordance with BS EN14428.

Complete Peace Of Mind

We're so sure of the quality of our products that we offer an lifetime guarantee on all our shower enclosures, walk-in panels and bath screens.*

Additionally, a dedicated team of showering experts whose knowledge and experience are on hand and ready to help before, during and after your products are installed.

Full warranty terms and conditions are available at www.crosswater.co.uk

Crosswater Clear Treated Glass

Untreated Glass

The Ultimate Glass Protection

Supplied as standard.

Crosswater Clear is a colourless surface treatment applied to all shower and bath panels. The coating is perfectly flat and invisible and works by creating a surface that helps prevent limescale, soap/shampoo build-up, easier to clean and sparkling glass every day.

Untreated Glass

Untreated glass can quickly and easily suffer permanent bonding of limescale and mineral salts onto its surface, which can cause staining and damage, with water spots being difficult, if not impossible, to remove despite regular cleaning.

Crosswater Clear Treated Glass

Helping to prevent build up and making the glass easier to clean, Crosswater Clear allows soils and liquids to 'slide off' the treated surface which prevents limescale and other dirt from building up to make cleaning a quicker and easier process.

Choosing the Right Shower Enclosure

Choosing the right type of showering enclosure can create a luxurious private space where you will feel protected, comfortable and relaxed in which to enjoy your perfect shower, always.

Crosswater's exciting range of enclosure types can be configured in numerous different ways to suit every bathroom.

Sliding Doors

Great for any size bathroom and a great space saver since the door does not swing out into the room. Sliding doors have two glass panels of which one slides on to open and close.

Easily fitted into an alcove or add side panels to create a corner solution.

Recess

With Side Panel

Hinged Doors

These doors offer the widest entry width, swinging out to open, on some models hinged inwards too. They can easily be fitted to a wall profile or an inline panel depending on the space available.

However, the bathroom has to be large enough. Without enough space, you won't be able to open the door fully.

Recess

With Side Panel

Three Sided Enclosure

With Inline Panel

With Inline and Side Panel

Pivot Doors

Pivot doors have an offset hinge mechanism which allows less of the door to fold into the room.

These doors are great for maximising door opening widths and reducing space required outside the enclosure.

Recess

With Side Panel

With Inline

With Inline and Side Panel

Quadrant

Quadrant doors are always used in a corner.

Sliding door versions are great for maximising space, a single door sliding quad version offers wider door opening; the hinged door option provides even wider door openings for more spacious bathrooms.

With Single Sliding Door

With Single Hinged Door

With Double Sliding Doors

With Double Hinged Doors

Infold Doors

Infold doors feature an ingenious, smooth cantilever moving action, half of the door folds into the enclosure and half into the room, saving space.

Great in smaller spaces this door type allows a greater opening space to access the enclosure.

Recess

With Side Panel

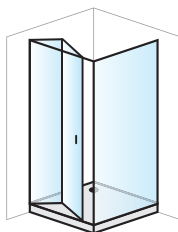

Bi-fold Doors

Bi-fold doors operate in the way that their name implies. Two glass panels fold in on themselves, thanks to central hinges and smooth-running rollers.

Because they don't swing out into the bathroom, they are excellent in smaller spaces with or without a side panel.

Recess

With Side Panel

Pentagon

Pentagon doors are also used when the shower is located in the corner. They provide good in shower standing space with the advantage of using less space in the room than a quadrant option.

Pentagon

Corner Entry

Great for smaller bathrooms since the doors don't open outward, corner entry enclosures have two doors sliding on rollers to create an easy access opening.

With Sliding
Doors

Choosing the Right Walk In Configuration

Walk-in shower arrangements are the ultimate in showering flexibility and allow you to enter the space more easily whether fitted to a tiled floor or shower tray. Walk-in showers provide stylish and practical showering solutions for all ages and when fitted with a level floor or tray are ideal for users with restricted mobility.

This type of showering solution typically includes one, two or three glass panels. Optional hinged deflector panels will provide even more practicality.

Please see our simple guide below to the most popular configurations and the Crosswater ranges in which you can accomplish them.

Colour influences the soul

There are many ways that you can combine colour, lighting and interior design elements to create a personality, emotion and sense of serenity and wellbeing within your bathroom in an otherwise neutral space.

Gallery 10's beautiful high-quality finishes, using 304 grade stainless steel and solid brass base materials, allow you to bring long lasting colour into your bathroom and perfectly match other signature elements such as brassware, furniture and accessories.

For our full range of products visit crosswater.co.uk

GALLERY 10 Designing Your Walk In

Identify your space

When designing your perfect walk in shower space, the first steps are to define who will be using the shower and the space you have or can create. Having decided those important factors, you can identify your wall configuration and measure your space. Typically there are three wall configurations as below:

Recess

Recess wall configurations are three sided, a back wall and two side walls, and the glass panel installs within this space.

Options for this wall type appear on page 18 numbered 1–6.

Corner

Corner wall configurations are two sided with the glass panel creating the other sides.

Options for this wall type appear on page 18 numbered 7–12.

Straight Open Wall

Straight open wall configurations allow the creation of two sided or single walk through type configurations.

Options for this wall type appear on page 18 numbered 13–18.

GALLERY 10 Configurations

Select your configuration

Once you have identified your wall configuration (see p.16) you can create your personalised showering solution; with our flexible modular glass panels, profiles and stabilising fixings the layout options are almost endless.

When choosing your configuration, we recommend you allow 500mm minimum entry space.

1. Recess with Wall Bracing Bar

- 1 x Glass Panel
- 1 x Wall Profile
- 1 x Glass to Wall Bracing Bar

2. Recess with Ceiling Bracing Bar

- 1 x Glass Panel (up to 1000mm max.)
- 1 x Wall Profile
- 1 x Glass to Ceiling Bracing Bar

3. Recess with Hinged Deflector

- 1 x Glass Panel
- 1 x Wall Profile
- 1 x Glass to Wall Bracing Bar
- 1 x Glass Panel for Hinged Deflector
- 1 x Deflector Panel 180° Hinges (pair)

4. Recess with Fixed Deflector

- 1 x Glass Panel (any size)
- 1 x Wall Profile
- 1 x Glass to Wall Bracing Bar
- 1 x Glass Panel (up to 400mm max.)
- 1 x Glass to Glass Brackets (pair)
- 1 x Glass to Glass Seal

5. Recess with Double Panel

- 2 x Glass Panels
- 2 x Wall Profiles
- 2 x Glass to Wall Bracing Bars

6. Recess with Double Panel

- 2 x Glass Panels (up to 1000mm max.)
- 2 x Wall Profiles
- 2 x Glass to Ceiling Bracing Bars

7. Corner with T Bracing Bar

- 2 x Glass Panels (up to 1000mm max.)
- 2 x Wall Profiles
- 1 x T Bracing Bar

8. Corner with Hinged Deflector

- 2 x Glass Panels (up to 1000mm max.)
- 2 x Wall Profiles
- 1 x T Bracing Bar
- 1 x Glass Panel for Hinged Deflector
- 1 x Deflector Panel 180° Hinges (pair)

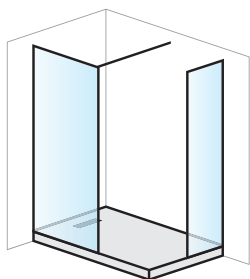

9. Corner with Fixed Deflector

- 2 x Glass Panels (up to 1000mm max.)
- 2 x Wall Profiles
- 1 x T Bracing Bar
- 1 x Glass Panel (up to 400mm max.)
- 1 x Glass to Glass Brackets (pair)
- 1 x Glass to Glass Seal

Additional Design Flexibility

The configurations shown are the most typical options; if you require something different please talk to your local bathroom specialist. For further installation information or to find your local retailer visit crosswater.co.uk

**10. Corner with Wall Bracing Bar**

- 1 x Glass Panel (any size)

- 1 x Glass to Glass Corner Seal
- 1 x Glass Panel (up to 400mm max.)
- 1 x Glass to Glass Brackets (pair)
- 1 x Glass to Glass Seal

GALLERY 10 Personalising Your Space

Consider Your Stabilising Fixings

To enable you to create your personalised showering space we have a range of stabilising fixings available. In all cases you should ensure a secure fixing. We do not recommend fixing to plasterboard alone, please consult your local installer for guidance.

Glass to Wall Bracing Bar

1200mm long. Can support panels up to 1400mm.

Glass to Ceiling Bracing Bar

600mm long. Can support panels up to 1000mm.

T Bracing Bar

1200 x 1200mm. Can support panels up to 1000mm.

Wall Profile with 15mm Adjustment

Can support panels up to 500mm without a bracing bar.

Glass to Glass Corner Seal

For joining two fixed glass panels.

Not sure what you need?

Please refer to the list below your chosen configuration on page 18 to identify the stabilising fixings you require.

Depending on the configuration you select you may need to use a combination of stabilising fixings.

If you need further guidance please visit crosswater.co.uk or speak to your local installer.

Reduce Splashing

Add on a 180° hinged or fixed deflector panel to create a personalised shower space with extra splash protection; giving the pleasure and luxury appearance of a walk-in shower in even the most modest of bathroom spaces.

180° Hinged Deflector Panels

Just as they sound a hinged deflector panel allows the glass to move, enabling greater access to the shower area then protect against overspray when the water is running.

Fixed Deflector Panels

Fixed deflector panels offer the same design flexibility particularly in smaller spaces. These can be installed using our glass to glass brackets and a glass panel up to 400mm.

Choose Your Perfect Shower Base

Our Gallery 10 Walk In collection can be installed with a shower tray or in a full wet room for full design freedom.

Complete Your Showering Space

We have everything you need to complete your perfect shower; from shower valves to shower heads in perfectly matching MPRO finishes for a fully co-ordinating bathroom. For our full range please visit crosswater.co.uk

GALLERY 10 Brushed Brass

Product Highlights

1. Wall profiles include concealed fixings, squeeze gasket seals for quick in profile adjustment and a top cover cap
2. Ultra-strong 304 grade stainless steel bracing bars finished to match for pivot doors with inline panels
3. Pivot doors with inline panels feature on glass adjustment and flush-fit solid brass hinges for easy cleaning
4. Concealed, fully adjustable top slider system for smooth soft closing
5. Beautifully designed 304 grade stainless steel double handle for easy opening and closing from inside or out
6. Flush-fit pivot door with inline panel solid brass hinge for easy cleaning and angled no-drip seal
7. Adjustable, self cleaning rollers feature a concealed brush to ensure the smoothest open/close sliding door

OPTIX 10

Colour influences the soul

There are many ways that you can combine colour, lighting and interior design elements to create a personality, emotion and sense of serenity and wellbeing within your bathroom in an otherwise neutral space.

Optix 10's beautiful high-quality finishes, using 304 grade stainless steel and solid brass base materials, allow you to bring long lasting colour into your bathroom and perfectly match other signature elements such as brassware, furniture and accessories.

KAI 6

Unrivalled engineering, design and outstanding value for money are the underlying characteristics of KAI 6.

Gently contoured silver anodised aluminium profiles with 6mm toughened glass offer plenty of adjustment for out of square walls.

A broad choice of door opening styles and sizes make KAI 6 ideal for smaller bathrooms where form and function are of equal importance.

STRONG HEART. AMAZING SHOWER.

At the heart of Crosswater's amazing showering experience is CROSSBOX. Like any healthy heart, it's quiet, reassuringly strong and clever.

A single universal easy-fit box offers 1, 2 or 3 water outlet options to create your perfect shower experience, and with multiple trim sets, you can create a wide range of different looks.

For more details visit www.crosswater.co.uk

Choosing the Right Shower Tray

Once you have decided on the shower enclosure type to create your personal space, you will need to select a matching shower tray unless you are creating a wet room environment.

The critical elements to consider are the height of the tray, the materials used and the position of the waste.

Height & Material

In most situations, consumers are looking to achieve the most minimal look in the bathroom and therefore gravitate towards our low profile 25mm trays. These low profile trays can be fitted onto concrete and wooden floors or recessed to create a level access solution.

All Crosswater 25mm trays are crafted from 100% natural stone resin with a very strong and durable protective gel coat which carries a Lifetime Guarantee.

If a stone resin alternative to our 25mm trays at a more competitive price point along with the Lifetime Guarantee is required, Crosswater offers a range of trays in thicker 35mm or 45mm profiles.

Waste Position

Depending on the range selected, the consumer has the option to choose from three waste positions.

Central

A central waste position offers the most direct route for the water to flow from the tray, and its flush design prevents an uncomfortable standing position for the user.

Linear

This option provides all the benefits of a central waste offering the cleanest lines and most minimal user experience.

Edge

This option moves the waste away from the standing area of the tray for a more comfortable user experience.

Available on 25mm Kai, 25mm Kai Anti Slip, 35mm Acrylic, 35mm Acrylic Anti Slip and 45mm trays.

All 25mm Crosswater trays include a high flow VORTEX waste which removes the water instantly, ensuring the user is never standing in a pool of water at the base of the enclosure.

Beneath the flush-fitting waste cover lies a hidden water capture channel.

This advanced technology ensures any water travels directly through the waste without the need for a build up of pressure, thus ensuring there is never water pooling on the tray.

35MM Acrylic Shower Trays

- Anti-bacterial acrylic capped construction with steel reinforcing frame.
- Impregnated anti microbial zeomic agent protects against bacteria and suppresses mould growth.
- High-flow 90mm waste outlet removes water quickly (30 lpm), ensuring no pooling.
- Matching white waste and silver cover, must be ordered separately.
- Suitable for fitting directly on concrete or wooden floors or can be raised (using optional panel riser kit).

Choosing the Right Bath Screen

Very often, the only solution to creating a shower space in the home is over a bath. There is no need to compromise on practicality over good looks, Crosswater bath screens allow you to have a relaxing soak in the bath and the opportunity to have a refreshing shower.

A shower bath screen can be fixed to the wall or connected to the wall using a hinge mechanism, and they come in a variety of shapes and sizes.

Single Panel

Single panel bath screens are the simplest design. Fixed, or swinging in, out or sometimes both they allow freedom when bathing or for easier cleaning.

Make sure you choose the right length to suit your bath and available space.

Single Panel

Single Hinged Panel

Single with Inline Panel

Bath Guard

Double Panel

Double panel bath screens typically offer wider coverage width, but given the hinge placement, they fold into a smaller space protruding less into the bathroom space.

Double panels allow you to create a virtual shower cubicle over the bath for a great all-round solution.

Double Panel

Double Panel Fully Folding

Triple Panel

Triple panel bath screens typically offer an even wider coverage width than double but two hinges allow a compact fold to reduce protrusion into the bathroom space.

Triple Panel

Four Panel

Fully folding bath screen options typically utilise four hinges to allow a wide coverage width to fold into the most compact configuration maximising space in the bathroom.

Four Panel Fully Folding

Product Guidelines

Product Compatibility

While the majority of Crosswater products are compatible, please take care when selecting products before ordering to avoid installation issues.

Trays must be plumbed and level, walls should be tiled down to the tray and sealed before doors or frames are fitted.

Dimensions are designed for tiled in trays, not unfitted tray sizes.

All doors and enclosures must be fitted to a tiled surface, not tiled up to the inside edge of the door.

Enclosures must not be completely sealed on the inside.

Due to the weight of the shower doors, you must ensure that the walls to which they are fixed are of suitable construction to support the enclosure.

Due to the nature of wetroom/walk in panel products, water integrity cannot be guaranteed. Please consult your installer.

All heights printed for shower doors and bath screens are from the top of the shower tray or bath

Installation

Products must be installed according to our installation instructions, please visit www.crosswater.co.uk for full details.

Cleaning

To maintain the look and performance of your Crosswater shower enclosure, you should:

- Remove any residual water after every use.
- Wipe clean the frame and glass elements with a soft, non-abrasive, colourfast cloth after every use.
- Never use an abrasive cloth or scouring pad which could damage the product.
- Clean the glass gently with warm soapy water and never use any aggressive fluids or strong household cleaning agents which could damage the product.
- Not allow limescale to build-up on any element, particularly in harder water areas.

Quality

All Crosswater showering products are CE / UKCA marked and are manufactured to the following standards:

- BS EN 14428 for shower enclosures.
- BS EN 12150 for toughened glass.
- BS EN 14527 for shower trays.

Clear 6 Patents

To provide the very best performing and safest shower doors using the latest materials technology several European patents have been approved for Clear 6. Details of these if required can be applied for by calling our technical department.

Lifetime Guarantee

The Crosswater Lifetime guarantee is subject to online registration and represents the perceived lifetime of the product, which is 25 years.

To register and activate your guarantee or for full details of all Crosswater guarantees, please visit www.crosswater.co.uk

Crosswater guarantees do not affect your statutory rights.
