// Product quality

Essentials conforms and exceeds required British and European quality, performance, safety, sustainability and water-saving regulations, created and nurtured by Crosswater to satisfy the demands made of a true British bathroom.

// Get the Complete Bathroom Look

At Crosswater, we take great care of all the little details so you do not have to. Essentials is a collection designed to work with you; a complete product offering that makes choosing your bathroom fittings simple.

Providing affordable designs that meet the requirements of our customers is key. Combine that with the latest developments in bathroom function and you have got the Essentials range. No compromises are made in the quality and usability of any product in the collection, so you can rest assured that your bathroom works hard to adapt to your bathroom routines.

We also ensure that simple, functional design does not compromise on aesthetics. Essentials combines the latest bathroom trends with contemporary materials and stylish finishes to create a space that is both user-friendly and appealing.

// Wall Hung Support Frames

Wall mounted furniture cleverly makes a compact bathroom appear less cluttered and more spacious. There is a range of frame sizes to suit larger rooms and ultra slim designs for those seeking a more sleek, minimalistic look.

Low Height Frame
WCF49X50+ **£235.00**
w 370 x d 90-240 x h 530mm
Requires concealed cistern

0.82m Height Frame
WCF82X50+ **£345.00**
w 500 x d 160-190 x h 820mm
Top and front flush

0.98m Height Frame
WCF98X50+ **£350.00**
w 500 x d 160-190 x h 980mm

1.18m Height Frame
WCF118X50+ **£345.00**
w 500 x d 140-190 x h 1140mm

ULTRASLIM 1.18m Height Frame
WCF118X50-VS **£360.00**
w 580 x d 90-110 x h 1180mm

// Features

- Epoxy powder coated steel frame, tested to take up to 400kg weight
- Large feet for easy rear fixing (specially designed for UK timber floor)
- Supplied complete with all fittings for installation
- Adjustable feet with rubber sound deadening pads
- UK sized inlet and outlet pipe work
- Easy install wall brackets for vertical or horizontal fixing

// Height variation

Choose from three flush plate heights

For toilets fitted underneath a window or perhaps an awkward space, flush function plates can operate from three different heights regardless of the support frame height.

0.82m Height Frame

0.98m Height Frame

1.18m Height Frame

// Smart design

Space saving solution

Achieve the latest in bathroom styling. Elegant, space saving wall mounted toilets are a great addition to any bathroom. The frame and cistern can be installed within the wall cavity or on the wall surface using one of our clever toilet furniture surrounds.

ULTRA SLIM 1.18m Height Frame
WCF118X50-VS **£360.00**

Presenting all of the features and benefits of the standard depth but with a reduced depth of 90mm, this option is ideal for bathrooms where space is limited or you want to incorporate a tiled surround.

// Concealed Toilet Cisterns

Create a sense of space and understated hotel style with a concealed cistern - a modern solution for a clutter-free, designer bathroom. There is a choice of heights to suit where the flush plate is situated, accommodating any constraints of the room.

// Features

- UK sized inlet and outlet pipe work
- Water saving dual flush cistern - factory set at 6/3 litre adjustable to 4.5/3litre
- Simple mechanical or cable connection method to ensure high performance
- Complete with accessible isolating valve
- Wide selection of decorative flush plates

// Enclosures & Trays

The Essentials enclosure range delivers a complete top-to-bottom solution that delivers on each element of in-shower use to combine with your chosen brassware. A wide selection of enclosures, bath screens and shower trays is available, all designed to offer superior functionality at affordable prices.

SHOWER ENCLOSURES	68
BATH SCREENS	78
SHOWER TRAYS	82

TOUGHENED SAFETY GLASS

Available up to 6mm in thickness, our shower panels and doors come with toughened safety glass as standard, offering complete peace of mind.

CROSSWATER CLEAR AS STANDARD

This invisible coating acts as a lasting barrier on the surface of our enclosure glass, helping to drastically reduce staining from water and chemical deposits.

DOOR OPENING OPTIONS

Looking for space-saving folding doors, or opting for inward opening? Whatever your preference, there's a choice of designs available.

ADJUSTMENT FOR EASY FITTING

We allow for up to a 60mm adjustment on our enclosures, to ensure that installation is easy and adaptable.

ENCLOSURE HEIGHT

We offer multiple height options on selected enclosure designs to create a tailored solution to fit every individual space.

FINISHES

There is a range of bespoke glass options available on selected enclosure designs, to create a space that is unique to you.

POWER SHOWER PROOF

We have carefully developed and tested our shower enclosure screens to ensure they can withstand the optimum performance of a power shower.

REVERSIBLE DESIGN

Whether your enclosure door needs to open to the left or right, our handy reversible function allows for either orientation.

LIFETIME GUARANTEE

The majority of our enclosures come with an impressive Lifetime Guarantee, covering all manufacturing defects to ensure long-lasting durability.

// Shower Enclosures

A comprehensive collection of shower enclosures, opt for variety of door styles, entry methods and handle options to create a tailored solution for you.

Anti-slip

Our anti-slip trays comply with DIN51097 class C - the highest anti-slip rating. We are the only manufacturer to thermo bond the Swiss Grip Antislip onto the tray with a curing process to ensure better performance for a cleaner and longer lasting surface. DIN51097 class C anti-slip ramp test.

Our anti-slip trays also conform to BS7976-2 within Sliptech's category for "Low potential for slip" which is the best possible rating.

Manufactured by hand in the UK from the finest natural materials

Unique leg set for easy installation

Durable and repairable gel coat finish

Easy clean 90mm vortex waste delivering up to 30 litres a minute

High flow waste

Waste must be used with Kai and Anti-slip 25mm trays ATHFWSQ90

Anti-slip trays conform to BS7976-2 Market leading anti-slip rating

Lifetime Anti-slip guarantee

Easy clean surface

Optional chrome waste

Must be used with 25mm Kai and Anti-slip stone resin shower trays - chrome finish

// Understanding your Water System

In order to select a showering system that will give optimum performance you need to identify the water pressure of the plumbing system in your home.

What is water pressure?

Water pressure is a term used to describe the flow strength of water through a pipe; it is measured in bar.

Identifying your water pressure rating

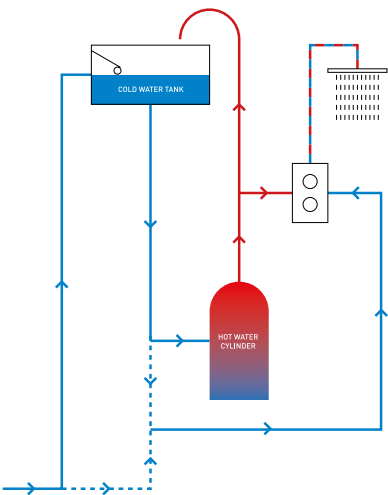

By identifying your home's plumbing system you can select a product that best suits your water pressure.

Why is this important?

Whilst the majority of Crosswater products are compatible with most systems, some high pressure (HP) products are designed to work with high pressure systems only. Products marked LP (low pressure) and MP (medium pressure) are also suitable for high pressure (HP) systems.

LP	minimum 0.2 bar	HP2	minimum 2 bar
MP	minimum 0.5 bar	HP3	minimum 3 bar
HP1	minimum 1 bar	HP4	minimum 4 bar

All products marked LP (Low pressure) and MP (Medium pressure) are also suitable for HP (High pressure) systems.

Hot gravity & cold gravity/mains

Low pressure systems (LP min 0.2 bar)

- ✓ You have a cold water storage tank in the loft.
- ✓ You have a hot water cylinder.
- ✓ You do not have a shower pump installed.

If all of the above apply to your home you can choose any product marked with LP (min 0.2 bar).

Note A gravity fed system provides MP (0.5 bar) to fittings downstairs in a 2 story property where the cold water tank is in the loft.

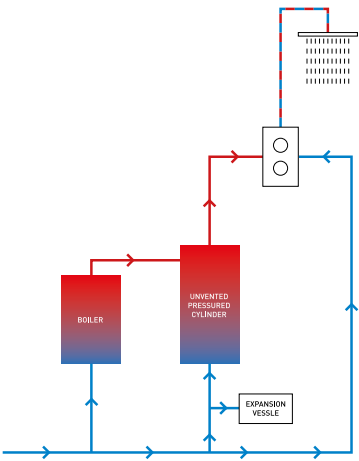

Combination boiler

Medium pressure systems (MP 0.5-1bar)

- ✓ You have a combination boiler that heats water on demand.
- ✓ You do not have any storage tanks.
- ✓ You do not have a shower pump installed.

If all of the above apply to your home you can choose any product marked with LP, MP or HP1.

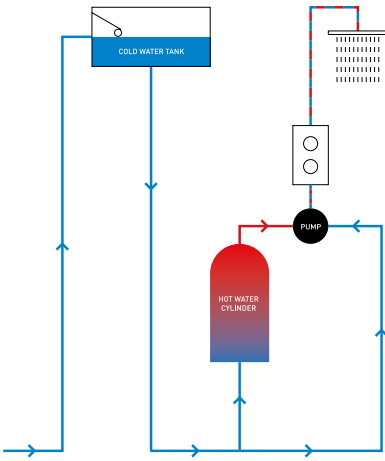

Mains high pressure

High pressure systems (HP1/2/3 2-3 bar)

- ✓ You have an unvented cylinder with an expansion cylinder.
- ✓ You have no cold water tank in the loft.

If either of the above apply to your home you can choose any product marked LP, MP, HP1, HP2 and HP3 (minimum 1/2/3 bar).

Pump assisted

High pressure systems (MP to HP4)

- ✓ You have a booster pump fitted.

Where a gravity flow of water is in excess of 0.6lpm, this is known as a 'Positive Head' condition (e.g. when your shower head is positioned lower than your cold water storage tank). In this situation, a positive shower pump can be used. A 'Negative Head' condition is when the gravity flow of water is less than 0.6lpm (e.g. when your shower head is positioned above the cold water tank level). In these conditions, a negative head pump must be used.

Negative shower pumps will work in both positive and negative head conditions. So for example, in a situation where there is a shower head above and below the water tank level; one negative shower pump can be used for both.

With the right pump, you can choose any of our products.

// Water saving

Regulators

We are all under pressure to save water in order to help the environment and reduce climate change. Part G of the governments' building regulations now requires all new domestic buildings to meet a maximum water consumption of 125 litres per person each day.

You can help to reduce the water consumption of your household by easily inserting a flow regulator into your basin tap or shower hose. This will allow you to control the amount of water your taps use.

5 lpm Basin Tap Flow Regulator
designed for taps with screw in circular aerator housing
35.6184.0 **£7.00**

8 lpm shower Flow Regulator
designed for hand showers or fixed heads operating min 1 bar
58.8638.1 **£4.00**

3.5 lpm Basin Tap Flow Regulator
designed for taps with screw in circular aerator housing
35.6182.0 **£7.00**

6 lpm Shower Flow Regulator
designed for hand showers or fixed heads operating min 1 bar
58.8636.1 **£4.00**

Basin Aerator 5.7lpm
40.8356.01002 **£5.00**

Information

Errors & Omissions

In the interest of continuing design and development and product improvement, Crosswater reserve the right to change colour, designs and product specifications without prior notice.

Product Compatibility

Whilst the majority of Crosswater products are compatible, care should be taken on product selection prior to ordering to avoid installation issues. Technical drawings are available on our website or on request.

When installing wall mounted products Crosswater strongly recommend making provisions for any in-wall access points, particularly when tiling, for maintenance purposes. Care should be taken in hard-water areas to ensure the cartridge is regularly cleaned.

Water Pressure (recommendations)

LP	minimum 0.2 bar
MP	minimum 0.5 bar
HP1	minimum 1 bar
HP2	minimum 2 bar

All products marked LP (Low pressure) and MP (Medium pressure) are also suitable for HP (High pressure) systems.

General

The colours and finishes reproduced in this brochure are as accurate as the photography and printing process allows but may vary from the actual colours. Product sizes stated are nominal and should be checked against product. It is strongly advised that all bathrooms are well heated and ventilated.

It is the responsibility of the individual installer to ensure that these products are fitted correctly and in line with the instructions provided. Failure to comply with the recommended fitting instructions will invalidate the guarantee.

Installation Notes

When installing a wall hung pan or wash basin please ensure that appropriate fixings or suitable framework are used. When purchasing a wall hung pan, wash basin or bidet on its own Crosswater does not supply any fixings. We strongly recommend all furniture and ceramics be fitted to a tiled surface, not tiled up to, this will assist any future maintenance.

All furniture ranges incorporate a factory fitted hanging system that allows safe and simple installation. Please ensure the correct wall fittings are used on solid or stud walls. Some furniture products are reversible for left or right hand door opening.

All shower door and bath screens incorporate a width adjustment feature offering between 15mm and 60mm width allowance to cope with out of true walls, ensuring that they sit squarely on the shower tray. Most products are reversible for left or right hand fitting.

Trays must be plumbed and level, walls should be tiled down to the tray and sealed before doors or frames are fitted. Dimensions are designed for tiled in trays - not unfitted tray sizes. All doors and enclosures must be fitted to a tiled surface, not tiled up to the inside edge of the door. Enclosures must not be completely sealed on the inside, please refer to fitting instructions. Due to the weight of the shower doors you must ensure that the walls to which fixing is to be carried out are of a suitable

construction to support the enclosure.

Due to the weight of some products you must ensure that the walls to which fixing is to be carried out are of a suitable construction to support the product.

Suites and Ceramics

Vitreous China is an extremely hard, non-porous product; but it is also breakable and therefore must not be put under stress during installation. Basin waste fittings if over tightened will create stress within the ceramic material which may in time cause the failure of the product. Waste fittings should be carefully sealed in silicone and the back nut hand tightened, one additional and final quarter turn using a suitable spanner is sufficient to create the required watertight seal. Care should also be taken when fitting brassware to tap platforms in order to prevent similar stress related failures. All products should be inspected before attempting installation.

Cleaning & Maintenance

All Crosswater products should be cleaned with warm soapy water only and polished with a clean, soft, dry cloth. NEVER use products containing bleach, caustic soda, cleaners of a gritty or abrasive nature or so called "glass and mirror" cleaning products. Mirrors, cabinets and light fittings: Clean only with a micro fibre cloth, NEVER use "glass and mirror" cleaning products.

Product guarantee*

All Crosswater products unless otherwise stated carry a 15 year guarantee, shower doors and bath panels a lifetime guarantee which covers all manufacturing defects. This guarantee does not cover damage during fitting or misuse.

- Taps & Mixers marked with a 5 year guarantee carry a 1 year guarantee on cartridges
- The guarantee is only available to original purchasers who have proof of purchase.
- If the product has been installed, Crosswater must be given the opportunity to inspect the product in the installed condition.
- If the product is defective in materials or manufacture the original purchaser must contact our Technical Department within 30 days of the fault occurring. If the fault is not resolved the goods should be returned to Crosswater and at our discretion we will refund the purchase price, repair and return the goods to you or send new goods or parts to you as a replacement, this shall constitute our sole obligation under this guarantee.
- Due to a continuous development program. If in our opinion the product has failed under the terms of the guarantee and a replacement is offered but identical goods are no longer available, Crosswater will replace it with our nearest equivalent product.
- This guarantee covers normal use; it does not cover faults caused by incorrect installation, wilful damage, neglect, misuse, modification, inappropriate cleaning, accidental damage and other events outside Crosswater control.
- The guarantee does not cover any product that has been altered or modified in any way without the prior written consent of Crosswater.
- If a claim is made under this guarantee and the defect is not due to faulty materials or manufacture, Crosswater reserve the right to charge the customer at the current hourly rate in respect of any service engineer time.
- The guarantee is only valid for products purchased, installed and used in the United Kingdom.
- The guarantee does not cover ex-display units.
- The benefit of this guarantee cannot be transferred to a third party.

The guarantee is in addition to and does not affect your statutory rights.

In the interest of continuing design, development and product improvement, Crosswater reserve the right to change colour, designs and product specifications without prior notice.

*With the exception of products detailed with a 5 year guarantee in this brochure, tap and mixer cartridges which carry a 5 year guarantee, and hoses, "o" rings, diverters

and shower hoses, Cistern fittings, radiator valves and toilet seats which are all guaranteed for 1 year. Crosswater products carry guarantees against manufacturing or component defects as follows:

Sanitary ware, ceramic and cast marble basins 15 years; Furniture, illuminated mirrors, bathroom cabinets and towel warmers 5 years. Edge bath screen, Supreme Deluxe bath screen and all seals - 12 month guarantee. 35mm shower trays - 5 year guarantee. Shower Wastes - 10 year guarantee.

Shower doors and bath screens, excluding display installations.

Glass breaks within 6 months of installation product replaced and costs for refitting are reimbursed by Crosswater

Glass breaks within 6-24 months of installation product is replaced but no fitting costs reimbursed

Glass breaks 24+ months of installation a 10% discount against a replacement product

General wear and tear to any of the above items would be considered a specific exclusion.
